

# PASS THE SMOG - SAVE FUEL

Date: 04/30/08  
1982 Mazda RX-7

I have been using Blue Sky off and on for about four years. This year I needed the dreaded smog check which I always fail, and get the \$500.00 from the state to repair it.

This time I took the advice from your web site and added 4 oz. And drove the car until I was almost empty. Filled the tank up and drove 10 miles and passed the smog check. The measurements were lower then in 2002 after I had new catalytic converters installed, about \$700.00.

Thank You  
Alfred

P.S. You may use this in you testimonials. Most wankel engines (rotary) don't pass smog the first time.

My name is J.C. and I owner, Continental Imports of Oakland, CA We specialize in Jaguars. A customer brought his 12-cylinder in to be smog tested. I personally performed a complete tune up on the car and did a preliminary emissions test, it failed. I added GreenSky to his fuel and sent his car out to get different computers to see if they were the problem. When the car came back in I did a preliminary smog test again and found the emissions had dropped dramatically. Instead of installing new computers and spending more time on the car I drove it to a smog station where it passed with flying colors! I could not believe it, GreenSky took a miserably failing car and made it pass! When ever a car comes in for a tune up for the emissions test we always add GreenSky.

1984 VOLVO

Okay...your product, BlueSky's GreenSky, has come through again w/ flying colors!  
Once again I followed your recommendations. This time I decided to include my results!  
(My first testimonial was in 2004...make note that this Volvo has FAILED the smog prior to 2004!  
I followed the same procedure -- using BlueSky -- in 2006, my Volvo passed...and here I am in 2008 w/ a PASS! THANK YOU!  
If ANYONE has ANY DOUBT that this product works, e-mail me! I back it 100%...!!!!

Thank you for your product. After using it, my NO emissions went from over 1700 each to under 500 -- about a 70% reduction in a 1988 Ford Mustang with over 180,000 miles on it.  
Thank you!  
Mark
